□□□ T206 INTRODUCTION TO DESIGN AND PRODUCTION □□□

Assignment 4- SCRIPTS!!!!

Find 3 examples of different kinds of scripts on the Internet:

Master scene script, split or two column script and/or semi-scripted…

Study how these scripts function. Provide links to your scripts and a couple BRIEF, but brilliant sentences about each one:

Points to help ponder…
Do these scripts conform to scriptwriting styles?
How does the format of the script help with the particular type of production?
How do these scripts treat audio and visual material? What about action?
Is there anything interesting or unusual about them?
How are they appropriate for the story or content?

See K&M 48-51 for script information.

You may have a tough time finding all three types, don't spend too much time searching if this is the case!

Please type and put your name on your assignment.
